School Welcome

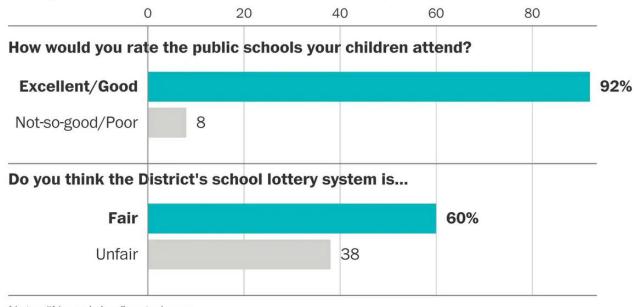

We've had a great start to the year!

Over 9 in 10 D.C. public school parents rate their children's schools positively, 6 in 10 say the lottery system is fair

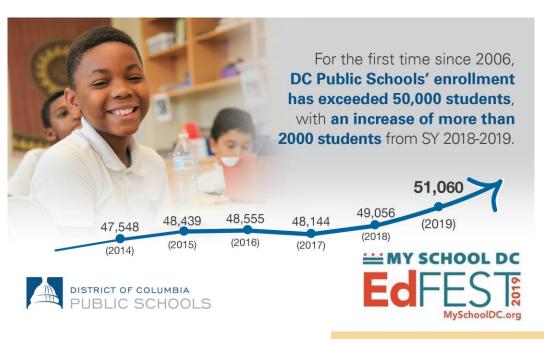

Among those with children in the District's traditional public or charter schools

Note: "No opinion" not shown.

Source: Nov. 12-17, 2019, Washington Post poll of 147 District residents with children in D.C.'s traditional public schools or charter schools with an error margin of +/- 10.5 percentage points.

Families are Choosing DCPS

SATURDAY, DECEMBER 14

Q&A with DCPS Leadership

Closing

Goals for Today

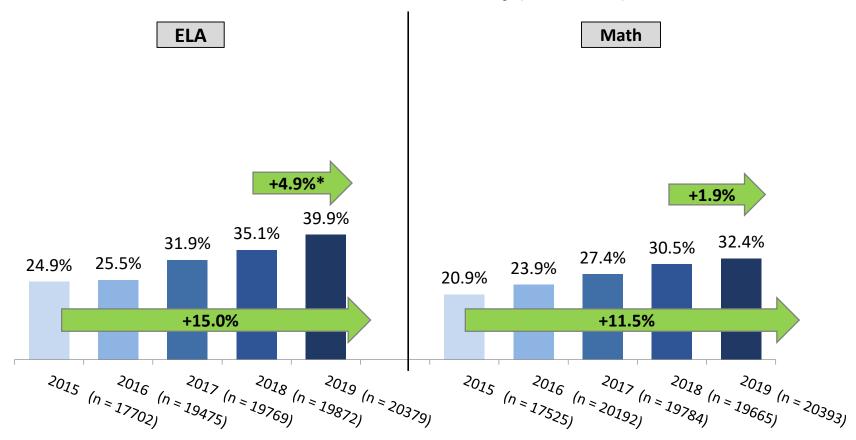

Together, we will discuss:

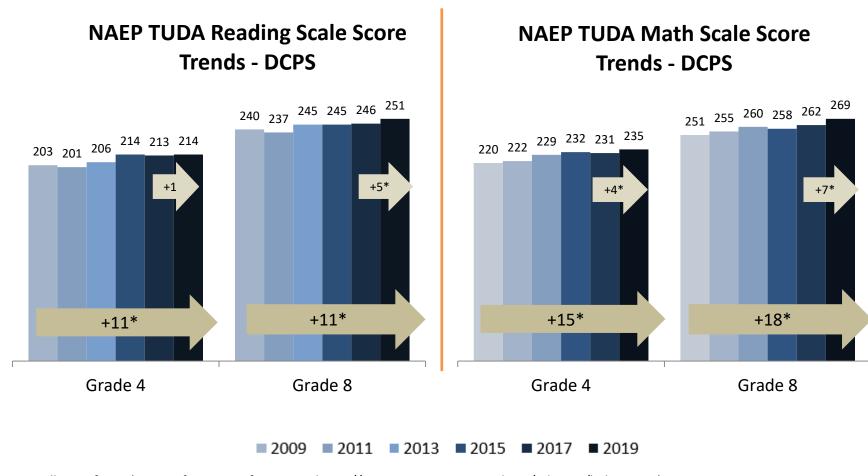

- 1. DCPS' current budget model
- 2. Our hopes for our future budget model
- 3. The important role you play in this work

DCPS has steadily improved on PARCC since 2015, with increases of 15 percentage points in ELA and 11.5 percentage points in math.

Overall DCPS PARCC Proficiency (% L4 + L5)

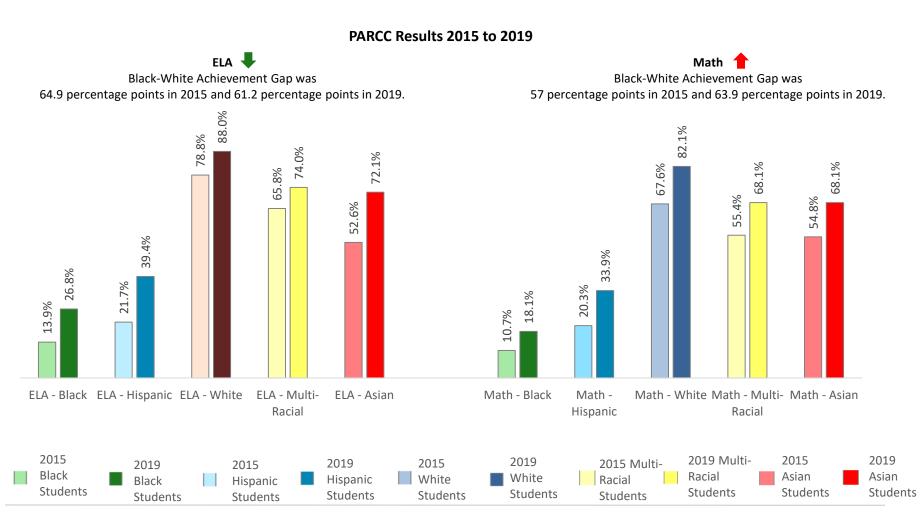

Our nation's report card, NAEP, highlights the strides made by DCPS students.

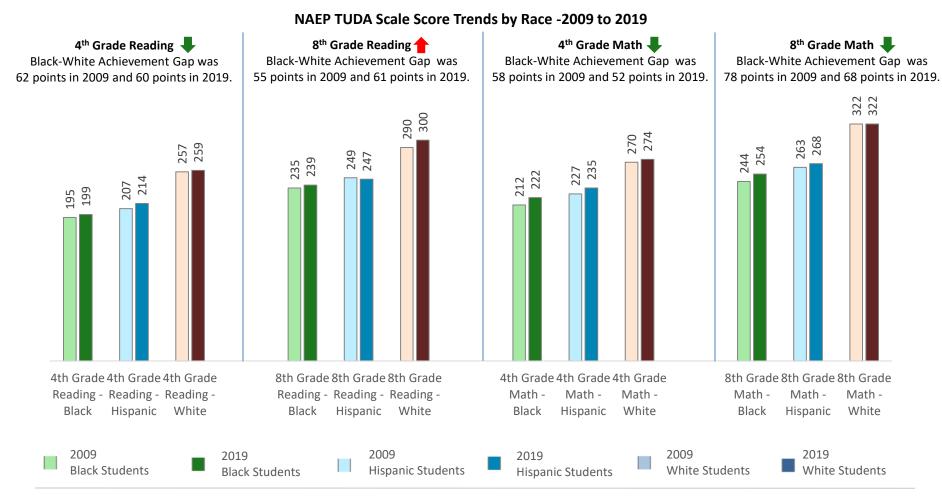

^{*}Statistically significant (p < .05; for more information: https://www.nationsreportcard.gov/ndecore/help#sec46)

We Are Making Great Progress... So What Are We Solving For?

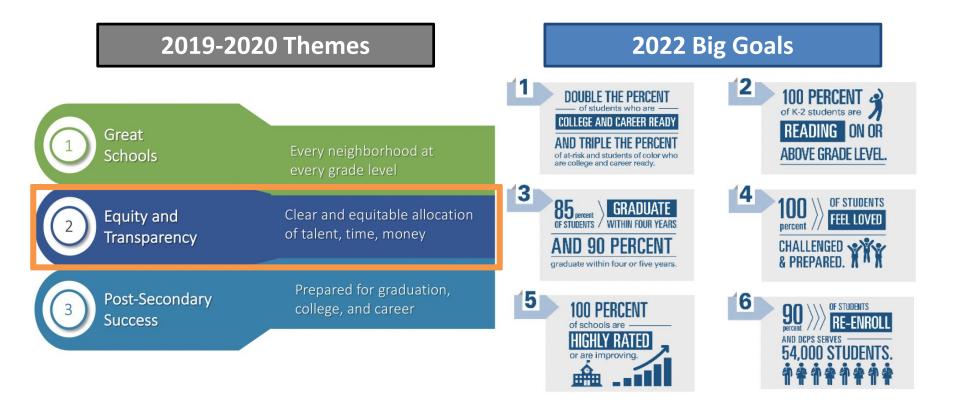

Despite systemic investments and improvements, the opportunity gap persists as measured by the PARCC.

Despite strategic investments, the achievement gap persists as measured by the NAEP.

To ensure continued growth and accelerate progress, we are focused on three themes for 2019-2020.

What are we solving for?

Is the current budget structure yielding the results in student outcomes that we want? What flexibilities exist so leaders can make the best decisions for all students?

Financial Sustainability

How do we create a model that is financially sustainable, given the reality of rising costs?

How do we help our stakeholders track dollars and understand how budget decisions are being made?

quity

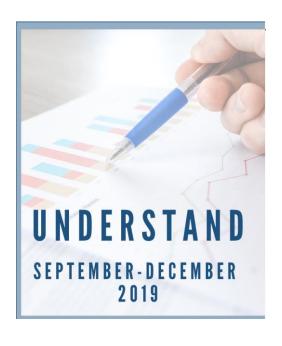

Transparency

A DCPS Budget for All

FY21: Refinement and Increased Transparency of Current Allocation Model

FY22: Design of Next Generation Budget Model

We are taking steps to make our budget model more **equitable** and **transparent**, and to empower principals to use resources more flexibly to improve student outcomes.

Did You Know...?
The Comprehensive Staffing Model:
History and Current Context

DCPS had a SBB model in the 1990s and transitioned to the CSM in FY09.

Student-Based Budgeting (SBB)

- DCPS launched a SBB model in the late 1990s; its implementation resulted in lack of consistency among schools' offerings.
- Allocated dollars to schools based on student demographics (similar to USPFF).
- Viewed as providing greater flexibilities for principals in how to use funds.

Comprehensive Staffing Model (CSM)

- DCPS launched the CSM in FY09 to establish a floor of consistency across schools (e.g. to offer art, music, PE in every elementary school); implemented in response to concerns that schools with decreasing enrollment were unable to fund core educational programming.
- Allocates positions to schools based on the school's expected enrollment and the staffing model for that school type (elementary, middle, high school, or education campus).
- Often hard for community members to understand the model.

Our current school budget model is multifaceted.

Initial Allocation

 DCPS has a CSM for each school type. The CSM allocates initial funding based on enrollment for:

Required Positions

e.g. principal, teachers, related service providers, etc.

Flexible Positions

e.g. business manager, assistant principals

Programs

e.g. NAF academies, JROTC, IB, etc.

Personnel Items (NPS)

Non-

e.g. library books, related art supplies, custodial supplies, etc.

- After the CSM has been modeled for a school, we check to ensure:
 - ✓ Each school has met a per-pupil funding minimum (FY20 \$10,400)
 - ✓ Each school's budget stays within 5% of the prior year's total funds (as required by the Fair Student Funding and School Based Budgeting Act of 2013)

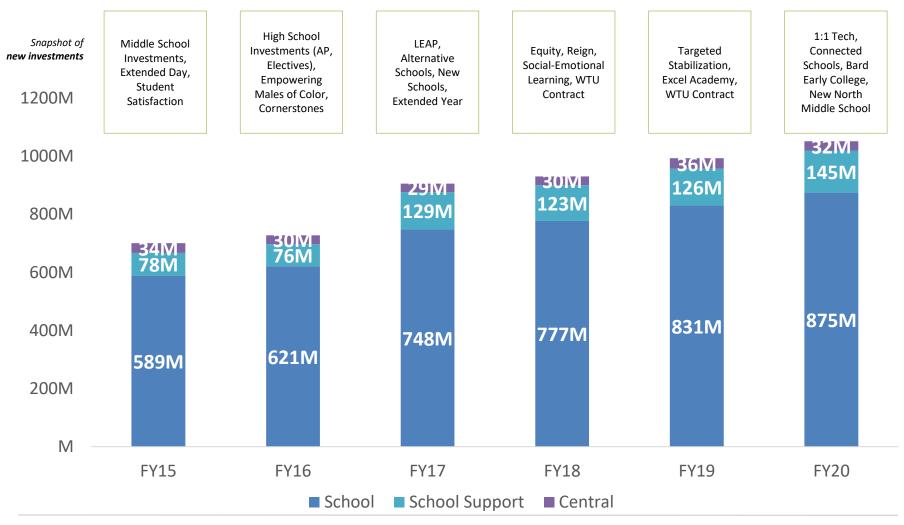

Submitted Budget

- After initial allocations are provided to schools, schools may petition to use positions differently from how they are allocated and/or request budget assistance for additional support.
- Requests are reviewed by central office before finalizing a school's submitted budget.

If a school's enrollment grows beyond its projection, we also provide additional teachers and associated funding.

Since the launch of the CSM in FY09, DCPS has increased investments in schools, while maintaining a flat central office budget.

Did You Know...? DCPS Budget Fast Facts

Fact #1: DCPS has a significantly lower student to teacher ratio than the national average.

Our current budget model, the Comprehensive Staffing Model, allocates 1 general education teacher per ~25 students on average.

With the addition of teachers for special education, English Learners, inner core, and to offer a wide range of secondary courses, our overall average staffing ratio is 1 teacher per 12.2 students.

Fact #2: The average teacher salary in DCPS is more than \$25,000 higher than the national average.

DCPS has the highest starting teacher salary in the country.

DCPS compensates teachers more in higher-need schools vs. lower-need schools.

Note: Salary data based on SY17-18 data. DCPS teacher salaries have continued to increase in recent years. These numbers do not include potential earned bonuses through IMPACT or other opportunities for additional compensation (e.g. admin premium).

Fact #3: Central Office administration accounts for 3% of the total DCPS budget.

Central Office (Examples: Human Resources, Office of the Chief Financial Officer): \$32.1 million

School Support (Examples: Curriculum and Instruction, Health and Wellness): \$144.6 million

Schools (Examples: Teachers, Principals, Special Education): \$874.9 million

DCPS invests the majority of funds in schools and in support of schools.

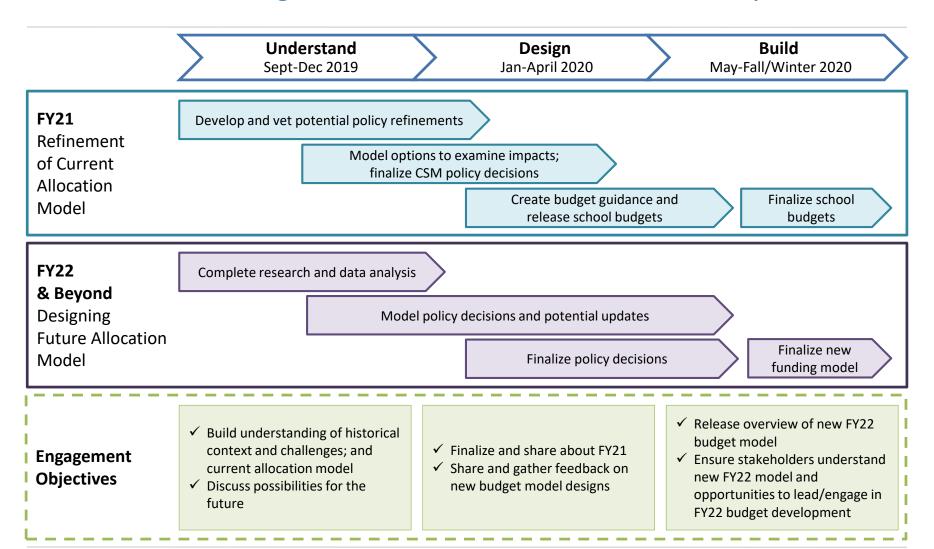

In FY20, for every dollar in the budget, nearly **97 cents** went to schools or to directly support schools.

DCPS' central office budget supports schools through three types of investments.

- School-based positions: Centrally-budgeted positions based in schools e.g. itinerant ESL teachers
- School support: Functions that support school operations e.g. curriculum and instruction, student placement, college and career readiness
- Central administration: Funds for district functions e.g. procurement, human resources, and financial administration

DCPS Budget Next Steps

Returning to our FY21 and FY22 Landscape

For FY21, DCPS is taking steps to help our community understand how our funds are allocated.

- **Highlighting new budget data**. New resources on the <u>DCPS Data Center</u> site will help community members understand how schools customized their budgets to reflect the needs of their individual school communities.
- Allocating school budgets by fund. Allocating by fund source (e.g. local funds, grant funds) will support schools in better understanding their grant funding.
- Summarizing year-over-year budget changes by school. A narrative section on each school's initial budget allocation will describe any key enrollment, student demographic, or programmatic shifts that affect a specific school's initial allocation.
- Revising the School Budget Guide. Changes will be informed by the community regarding how to make the guide clearer and more transparent. For example, DCPS may add an executive summary section to make the document more accessible.
- Sharing more content on the central office budget. This year, this guide offers more details on the role of the central office, its overall budget, and how funds are spent.

Next Steps: Learning More About the DCPS Budget

- 1. Check out the DCPS Interactive Data Center online at dcpsdatacenter.com for information and previous years' budget information.
- 2. Work with your school's Local School Advisory Team (LSAT). LSATs are school-based advisory groups made up of parents, staff and community members that work with principals on a range of topics including school budget development.
